

Gramaxnp

Liquid Seed Application
7012

This product is intended for use in small grains. The micro-organisms in Biolevel GramaxNP have been shown to increase availability of Nitrogen, Phosphorus and Potassium can increase plant uptake. Increased nutrient uptake can lead to an increased yield.

DIRECTIONS FOR USE

This product is intended for small grains. A single application per growing season is recommended. This product can be slurried with non-aqueous and non bactericidal seed treatments or applied as a separate application. Confirm compatibility of inputs in a sample prior to use. This 10L container of seed coating can treat 70 acre (28.5 ha). Higher seeding rates have a lower application rate (as per table below) as more seed per acre serve as a carrier to bring microbes to the field.
